Soft Skills

- Leadership and interpersonal communication
- Strong organizational and coordination abilities
- Analytical and problem-solving mindset
- Adaptability and continuous learning attitude
- Team collaboration and initiative-taking

LANGUAGES

- English
- Sinhala

ABOUT ME

I am a motivated and detail-oriented BSc (Hons) Computer Science graduate from the University of Plymouth, UK (affiliated with NSBM Green University, Sri Lanka), having completed my degree with a Second Class Upper Division. I possess a strong academic foundation and a keen interest in Software Quality Assurance and software testing.

I have a solid understanding of the Software Development Life Cycle (SDLC), Agile and Scrum methodologies, and defect lifecycle management. Through academic and project-based experience, I have gained exposure to manual testing concepts, test case preparation, bug tracking using tools such as JIRA, and ensuring software quality through systematic testing approaches.

As a fresh graduate, I am eager to commence my professional career as a Software Quality Assurance Intern, where I can contribute to delivering high-quality, reliable software by identifying defects, validating requirements, and collaborating closely with development teams, while continuously enhancing my QA skills in a professional software development environment.

EDUCATION

BSC(HONS)COMPUTER SCIENCE	2022 – 2025
University of Plymouth((Affiliated with NSBM Green University, Sri Lanka) Second Class Honours(Upper Division)	
ADVANCED LEVEL PHYSICAL SCIENCE	2018-2022
T/Agrabodhi College Kantale	
ORDINARY LEVEL	2012-2017
T/Kantale Central College	
PRIMARY EDUCATION	2007-2011
T/Kan/Bhathiyagama primary School	

CAREER OBJECTIVE

To secure a Software Quality Assurance Intern position where I can apply my knowledge of software testing principles, SDLC, Agile methodologies, and defect tracking tools to ensure high-quality software delivery while gaining hands-on industry experience and growing as a QA professional.

PROJECTS

- Girly Fashion Store - MERN Stack E-commerce Web Application
Developed an online fashion retail platform with product management, user authentication, and admin dashboard.
- BuildCore - Collaborative Building Design and Construction Platform
Developed a web platform enabling client–architect collaboration and real-time project updates. Implemented role-based dashboards and project tracking for multiple user types.
- Furniture Store (HCI Group Project)
Developed a web-based interactive furniture store with 3D model viewing and room customization features. Implemented furniture rotation, color customization, room layout design, and saved design management using React and Babylon.js.
